

Research at ABNS

Lynne Grief, PhD, RN, CEN, TCRN
Leslie Patry, MSN, RN

Research Mission at ABNS

- To promote research activities that advance knowledge regarding specialty nursing certification.
- The Research Committee is charged with implementing tactics and projects that support our strategic goals related to research including:
 - Establishing a national nursing certification research agenda.
 - Encouraging and facilitating the conduct and dissemination of research on nursing certification and continued competency.

Research Strategies

The ABNS Strategies for Research Support: To Support the Conduct of Research and Promote the ABNS Research Agenda document offers a brief background on the creation of our Research Agenda, and identifies a variety of methods or models to structure/support research projects *as funding becomes available*. Potential models are explored to determine their feasibility in terms of required infrastructure and resources.

ABNS Web Site Information

- To access research documents at ABNS go to the following URL:
- <http://www.nursingcertification.org/>
- Access the Icon title "Resources" at the top of the home page, then access the Icon "Research" and you will have access to the research documents

Research Committee

- Re-established in 2017
- Two meetings held to ascertain research ideas

Potential Funding Objectives Identified by Research Committee

- Fund 1 PhD and 1 DNP student each year
- Fund those members with a doctorate who are doing research or evidence-based practice projects focused on certification
- Mentor doctoral students by connecting them with an experienced researcher
- Develop on-line educational activities to address areas of research and evidence-based practice

Membership Involvement

- We want **your** thoughts about the proposed objectives
- What **ideas** do you have for the research agenda of ABNS?

Thank You for Your Participation
