OBJECTIVES

- Discuss various organizational leadership perspectives on the changing political landscape,
 - considering certification as point of reference
- Discuss how organizations can better position themselves in a changing political environment
- Panelists will:
 - provide brief overview of their experience underpinning their perspective
 - react to questions that have been developed to facilitate the discussion
- Audience will:
 - **PARTICIPATE**

OVERVIEW OF KEY NOTE

Changing Landscape of Health Care:

Impact of US Political Paradigm Shifts

- Global/US Political/Healthcare/Nursing paradigms
 - Instant access to information; renewable energy; organic food; consciousness shift
 - -isms; working class ideology; healthcare issues (coverage, state control, SOP, ACA repeal/replace/repair)
 - Toxic stress; acute to chronic illness shift; genetics; nutrition; aging
 - DNP; full SOP; nurse-led practices; faculty shortage

QUESTION ONE

What are your initial reactions to yesterday's key note presentation?

The Changing Landscape of Health Care: The Impact of Political and Professional Paradigm Shifts.

An "International" Perspective

A FEW THOUGHTS...

- The whole world is standing back – what's next?
- Change can be tolerated – Uncertainty creates anxiety and "angst"
- There are swings to the "Right" and to the "Left" – making it difficult to "live our values"
- Healthcare is a right – not a commodity – philosophical perspective
- Border situation makes it difficult for consultants, physicians - there are practical implications
- Refugees - *Asylum Seekers* - crossing into Canada on foot – new phenomenon

QUESTION TWO

What have been the opportunities or benefits to you, or the organization's that you interact with, as a result of the Affordable Care Act (ACA)?

QUESTION THREE

What do you see as the risks and/or benefits from this Presidential administration (e.g., to healthcare, business, etc.)?

QUESTION FOUR

From your perspective, what issues are your organization's watching/monitoring and on what issues do you anticipate having to take action as part of this political paradigm shift?

(Please do not limit your perspective to ACA repeal.)

"Be the change that you wish to see in the world"

Mahatma Gandhi

Thank You
